Title: Call for Participation to A Workshop on Study Period projects for;

- (1) ROR,**
- (2) On-Demand Model Selection,**
- (3) Semantic Metadata Mapping Process**

Date: 2008.06.01

Source: He Keqing , Hajime Horiuchi , Doo-Kwon Baik

Rationale:

The SC32WG2 approved a couple of new study projects on the topics, such as the ROR (Registry Of Registries), the On-Demand Model Selection and the Semantic Metadata Mapping process at the SC32 Sydney meeting (SC32WG2N1129, N1131, N1122).

The ROR, the On-Demand Model Selection, the Semantic Metadata Mapping process, those are new and challenging projects that could be close related each other, addressing the emerging concerns on the service interoperation among heterogeneous domains through the new type of registry standards.

Then, a workshop on these topics should be needed to calibrate scopes and investigate technical issues through the F2F discussions. It will be held at the Wuhan University, Wuhan, China as followed.

It must be good opportunity to investigate new directions of applications of the MDR (ISO/IEC11179) and the MFI standards (ISO/IEC19763).

Date: Sept. 4th(Thu), 2008 – Sept. 6th(Sat), 2008 (To Be Decided)

Place: SKLSE (State Key Laboratory for Software Engineering) of Wuhan University, Wuhan, China.

Details should be announced by the project leader, later.

Host: He Keqing (Wuhan University, China)

Co-organizers: Hajime Horiuchi (Tokyo International University, Japan)
Doo-Kwon Baik (Korea University, Korea)

Draft agenda of a Workshop on Study Period projects for;
(1) ROR,
(2) On-Demand Model Selection,
(3) Semantic Metadata Mapping Process

September 4th (Thursday)

- Introduction of participants
- Adoption of agenda
- Presentation on ROR and its technical discussion
- Presentation on On-Demand Model Selection and its technical discussion
- Presentation on Semantic Metadata Mapping Process and its technical discussion

September 5th (Friday)

- Presentation on other projects concerning the service interoperation among heterogeneous domains and their technical discussions
- To list the issues that need to be harmonized among the projects
- Discussion on the issues listed

September 6th (Saturday)

- Discussion on the issues listed (continued)
- Discussion on new directions of applications of the MDR (ISO/IEC11179) and the MFI standards (ISO/IEC19763).
- Wrap up
- Adjournment
